

FT5000

A high-volume, reliable ATM you can afford.

For years, the ATM industry has trusted Triton for innovative technology that's practical and cost efficient. Now Triton delivers again with the FT5000, a versatile through-the-wall ATM that offers high performance for a surprisingly low investment. Our long-time experience in producing innovative, high-quality ATMs has led us to develop this product focused on the financial institution market.

What makes the Triton FT5000 most popular with banks and credit unions is its highly cost efficient operation. Financial institutions can place the FT5000 in a drive-up

or walk-up setting and utilize two to four cassettes based on transaction volumes. The Microsoft® Windows® CE 5.0 operating system and Triton's X2 technology makes a long list of revenue-generating, added-value services possible. And of course, you can count on the reliable operation that has made Triton a leader in the industry.

Performance. Reliability. Easy and inexpensive to service. Thanks to Triton, there's finally a through-the-wall unit made just for you.
