HITACHI: iH-110 (Currency Discriminator - 2 Pocket)

The Hitachi: iH-110 Currency Sorter is an intelligent and reliable banknote counter, which uses image processing technology to recognize banknotes and to discriminate denominations. The iH-110 features Full Color Imaging with Dual CIS scanning, which scans both sides of the bills to reduce unwanted rejects. The 2-pocket design, with a stacker and a reject pocket, allows the iH-110 to count and off-sort without stopping. Having a reject pocket allows operators to perform daily cash-processing jobs without any interruption.

FEATURES:

- **Counting Modes Include:**
  - **Mixed:** Counts mixed money, providing grand total and itemized count.
  - **Single (Sorting):** Counts 1 Denomination and sorts all other denominations into reject pocket.
  - **Face:** Faces all bills (heads up or heads down)
  - **Orientation:** Orientates all bills in proper direction: (heads facing right or heads facing left)
  - **Count:** Counts all bills, providing quantity total.
- **40+ Foreign Currencies Available**
- **Dual CIS Scanner** (Scans both sides of bills to reduce unwanted rejects.)
- **Full Counterfeit Detection**
- **4.3-inch Color Touch Screen**
- **Easy Upgrade** (USB Flashdrive)
